

The Culture of Quantum Leap

Quantum Leap is a global community of diverse Team 2 graduates. We are visionary world-class leaders sourcing transformation through communication, causing miraculous results globally.

We support and witness one another having our lives work and in fulfilling our games in the world.

We are grounded in our stand for self-expression, powerful leadership, and transformation.

We contribute an extraordinary listening and support for one another.

We offer structures for accountability and, although not a coaching group, will provide it when requested.

Quantum Leap is an ongoing inquiry into new paradigms of leadership; a collaborative leadership sourced from within its membership rather than a designated leader. We foster a culture of co-creation.

Quantum Leap is the place to BE, to be powerful and empowered beyond imagination. We honor who we are as our word.
